

**IN THE SPECIFICATION:**

Please amend the specification as follows:

Before the first line in the application, please insert --This is a Divisional of U.S. Application No.: 09/809,310, filed March 16, 2001.--

Page 9, lines 13-21, please replace the paragraph with the following replacement paragraph:

-- As shown in the drawings of FIG. 4A and FIG. 4B, cylinder-shaped conductors are taken as examples of the inner and outer conductors 404, 402. However, the coaxial via hole of the invention is not limited thereto. On the contrary, the inner and outer conductors can be in any shape only if the two conductors extend along with the Z-axis and are completely separated by an insulating fill. Therefore, any configurations of the two conductors with cross sections shaped in, for example, circle, oval, round, rectangle are within the scope of the invention. Moreover, the configuration and the cross-section of the inner and outer conductors can be different from each other. --
